SYSTEM REQUIREMENTS

MACINTOSH:

- OS X 10.12 or higher
- 4 GB of RAM
- 1024 x 768 display or better
- Internet to activate and register

IDMarkz is sold in two ways. A Perpetual (often termed a life-time version) or offered as a yearly Subscription. You can choose.

FEATURES

- Open higher CC files in CS4, CS5, CS5.5, CS6
- Exports to IDML, PDF and image formats
- Preview .indd files
- Share pages or entire files as images
- File Inspector
- Open InDesign docs in QuarkXPress, Affinity Publisher, Adobe Acrobat and InDesign

BENEFITS

- Eliminates the need to ask clients to export IDML
- Does not require Creative Cloud subscriptions
- Reduces time re-creating content
- Provides a way to deal with tricky .INDD files
- Helps keep InDesign files healthy

Stand-alone application

IDMarkz is replacing two Markzware products, ID2Q and MarkzTools2.

MarkzTools had InDesign to IDML, which IDMarkz also provides. ID2Q gave a native InDesign to QuarkXPress conversion. Yet since Quark added IDML import to QuarkXPress, now IDMarkz will fit better in that workflow.

With IDMarkz, you do not need InDesign to import InDesign layouts!

PRODUCT OVERVIEW

Preview, export and interchange Adobe InDesign files without the need for the native application! IDMarkz is the next generation of Markzware conversion tools which goes steps further than pure conversion. You can even open your .indd files in other DTP applications!

IDMarkz is a full, native preview utility. That part is even free for any macOS user that needs to work with InDesign files! You can preview the entire InDesign document, even allowing you to zoom in and out on any page. You'll also get a handy File Info window, which is like a mini preflight overview of the entire document. This is helpful before taking the next workflow steps with incoming or unknown .indd files.

Next, you can choose to export to a host of graphic design and print formats, including IDML. This allows any older InDesign users to open and use newer, modern InDesign files saved in CC 2020 or lower! You can also export to PDF. Plus IDMarkz gives you the ability to export to PNG, JPEG, TIFF and other image formats. There is even the ability to "share" a document or any given page via various mediums, like Mail or social media.

IDMarkz will also allow you to open InDesign files in QuarkXPress, Affinity Publisher, Adobe Acrobat, Illustrator or even InDesign itself. There are various workflow automations, so that you can auto open any .indd file in a specific InDesign version or always export to IDML, and so forth. There is much more, so check out the webpage for full details!
